📍 Lahore, Pakistan

SUMMARY

I am a recent graduate from the University of Central Punjab with a burgeoning interest in web development, particularly in the MERN stack. Over the last two months, I've immersed myself in MERN technologies, laying the foundation for my career. During this time, I've completed coursework, resulting in the development of five React applications and three Node.js and Express APIs. Additionally, I undertook a full-stack project and contributed to a university-finding website project during my studies. While my proficiency in the MERN stack is at a foundational level, I am driven by a strong commitment to learning and growth. Based in Lahore, Punjab, I offer local insights and an eagerness to contribute to the tech community here. I am excited to embark on my web development journey, leveraging my existing skills and my dedication to ongoing improvement to make a positive impact on innovative projects.

EXPERIENCE

Web Developer

Self Employed

📅 07/2023 - Present 📍 Lahore, Pakistan

. Independently managed and executed a series of foundational web development projects as part of my learning journey.

- **React Projects (Front-End Only)**
 - Recipe Finder (Educational)
Designed and implemented a basic React application that serves as an educational project, demonstrating my initial front-end development skills while learning the MERN stack.
 - Weather App (Learning Focus)
Developed a simple React-based weather application to gain hands-on experience in UI/UX design and API integration, reflecting my early-stage learning process.
 - To-Do List (Foundational)
Created a fundamental to-do list application in React, emphasizing my foundational grasp of JavaScript and React concepts.
 - Markdown Editor (Skill Development)
Explored the world of text editing with a Markdown editor application in React, showcasing my commitment to skill development and exploration.
- **Node and Express Projects (Back-End Only)**
 - Chat Messaging API (Learning Journey)
Designed and implemented a Node.js and Express.js API for chat messaging, highlighting my progress in back-end development and API design during my learning journey.
 - Task Management API (Hands-On Learning)
Developed a Node.js and Express.js API for task management, demonstrating my early experiences with database integration and RESTful API development.
 - Face Recognition App Backend (Skill Building)
Played a role in building the back-end system using Node.js, Express.js, and PostgreSQL for a face recognition application, gaining valuable database management skills and API integration knowledge.
- **Full-Stack Project (React, Node, Express, PostgreSQL)**
 - Face Recognition App (Comprehensive Learning)
Built a full-stack project involving React, Express.js, Node.js, and PostgreSQL for a face recognition application, showcasing my dedication to comprehensive front-end and back-end integration during my learning process.
