

# Gohar Butt

## Software Engineer

Recent graduate from the University of Central Punjab, passionate about web development with a focus on the MERN stack. Successfully completed coursework, including the development of five React applications and three Node.js/Express APIs. Actively contributing to a live project at Creative Logicx, specializing in Next.js. Eager to leverage my skills and commitment to continuous learning for impactful contributions to innovative projects. Based in Lahore, Punjab, offering local insights and enthusiasm for community collaboration.

- As a Frontend Developer at Creative Logicx, I'm actively involved in the live project Kreaitor.io. I've played a key role in crafting innovative features, including Text-to-Speech, Speech-to-Text, Email Generator, and Progressive Web Applications, all seamlessly implemented using Next.js. Excited to contribute to the project's success with a focus on user-centric functionalities and cutting-edge web technologies.

## SKILLS

C++

React

Node.js

Express.js

SQL

Next.js

MongoDB

## PERSONAL PROJECTS

### React Projects (08/2020 - 10/2023)

- Recipe Finder (Educational) Designed and implemented a basic React application that serves as an educational project, demonstrating my initial front-end development skills while learning the MERN stack.
- Weather App (Learning Focus) Developed a simple React-based weather application to gain hands-on experience in UI/UX design and API integration, reflecting my early-stage learning process.
- To-Do List (Foundational) Created a fundamental to-do list application in React, emphasizing my foundational grasp of JavaScript and React concepts.
- Markdown Editor (Skill Development) Explored the world of text editing with a Markdown editor application in React, showcasing my commitment to skill development and exploration.

### Node and Express Projects (08/2023 - 10/2023)

- Chat Messaging API (Learning Journey) Designed and implemented a Node.js and Express.js API for chat messaging, highlighting my progress in back-end development and API design during my learning journey.
- Task Management API (Hands-On Learning) Developed a Node.js and Express.js API for task management, demonstrating my early experiences with database integration and RESTful API development.
- Face Recognition App Backend (Skill Building) Played a role in building the back-end system using Node.js, Express.js, and PostgreSQL for a face recognition application, gaining valuable database management skills and API integration knowledge.

### Internship And Full Stack Projects (12/2023 - Present)

- Face Recognition App (Comprehensive Learning) Built a full-stack project involving React, Express.js, Node.js, and PostgreSQL for a face recognition application, showcasing my dedication to comprehensive front-end and back-end integration during my learning process.
