WORK EXPERIENCE

Software Engineer
Creative Logicx

01/2023 - Present   *Lahore, Pakistan*

Next JS, MERN, MYSQL, AI, Web Sockets, Socket.IO, Express, Node

- Built multiple **Front-End Features** for AI based application in **Next JS.**
- Built **Progressive Web Apps** using Next JS libraries.
- Built Chat Messaging Application using **Web Sockets** and **Socket.io** libraries.
- Developing web apps using **Node, Express** framework (Models, Views, Templates & integration with database).
- Developed RESTful APIs using **Express** Framework.
- Developed **bidding systems** in **Node JS** for dental doctors.
- **Face Recognition App:** Built a full-stack project involving React, Express.js, Node.js, and PostgreSQL for a face recognition application, showcasing my dedication to comprehensive front-end and back-end integration during my learning process.
- **Den Derma :** As a **Backend Developer**, my responsibilities include crafting innovative features to enhance user interactions. I've successfully implemented **bidding systems** in which doctor can bid an amount according to the patient medical history and patients can pick up the bids accordingly using **Node.js** and **Express.js**.
- **Kreaitor.io :** Currently, I am actively contributing to the development of Kreaitor.io, a dynamic web platform. As a **Frontend Developer**, my responsibilities include crafting innovative features to enhance user interactions. I've successfully implemented functionalities such as **Text-to-Speech, Speech-to-Text, Email Generator, and Progressive Web Applications** using **Next.js**.
- **EarthPay Merchant :** I've contributed to the development of EarthPay Merchant, a dynamic web platform. As a **Frontend Developer**, my responsibilities include crafting innovative features to enhance user interactions. I've successfully implemented UI of the application according the **Figma** designs and integrated **Bank Payment** feature using **React.js**.

EDUCATION

Bachelors in Computer Science
University of Central Punjab

10/2019 - 07/2023   *Lahore, Pakistan*

SKILLS

`C++` `React.js` `Node.js` `Express.js` `SQL` `Next.js` `MongoDB` `Javascript` `Socket.io` `Material UI` `Tailwind CSS` `Bootstrap` `Agile Software Development` `JIRA`

PERSONAL PROJECTS

React Projects (08/2020 - 10/2023)
- Recipe Finder (Educational) Designed and implemented a basic React application that serves as an educational project, demonstrating my initial front-end development skills while learning the MERN stack.
- Weather App (Learning Focus) Developed a simple React-based weather application to gain hands-on experience in UI/UX design and API integration, reflecting my early-stage learning process.
- To-Do List (Foundational) Created a fundamental to-do list application in React, emphasizing my foundational grasp of JavaScript and React concepts.
- Markdown Editor (Skill Development) Explored the world of text editing with a Markdown editor application in React, showcasing my commitment to skill development and exploration.

Node and Express Projects (08/2023 - 10/2023)
- Chat Messaging API (Learning Journey) Designed and implemented a Node.js and Express.js API for chat messaging, highlighting my progress in back-end development and API design during my learning journey.
- Task Management API (Hands-On Learning) Developed a Node.js and Express.js API for task management, demonstrating my early experiences with database integration and RESTful API development.
- Face Recognition App Backend (Skill Building) Played a role in building the back-end system using Node.js, Express.js, and PostgreSQL for a face recognition application, gaining valuable database management skills and API integration knowledge.
